

1. Around waist where you want the top of the chaps to be
1A. Top of chap waist to center of knee.
2. Upper thigh—around the top of the leg at the fullest part
3. Mid Thigh (halfway between upper thigh and center of knee)
4. Around kneecap
5. Around the fullest part of the calf
6. Waist to crotch---take this measurement on the front of the person from the bottom of the belt buckle just to the top of where the legs meet. Do not run the tape under to the seam of the jeans.
7. Crotch to knee----take this measurement from the top of the leg (where you finished measurement # 6) to the center of the knee
8. Outseam---from the top of the chaps straight down to the floor on the outside of the leg. Do NOT add extra inches
9. Center of knee to top of toes
10. Inseam---from crotch straight down to the floor on the inside of the leg standing with feet together

Pull the measuring tape only as snug as you want the finished chaps to fit. Do not pull it so snug as to crease the leg and do not put a finger under the tape. We add one half inch to the measurements you give us for ease of fitting. Please be wearing the boots and jeans/pants you'll use with your chaps when you are being measured. Do not try to take your own measurements! Have someone do it for you.
